

■ READINESS ASSURED: SMART FIRE PROTECTION REMOTE MONITORING AND TESTING SOLUTIONS

To guarantee faultless operation of a fire extinguishing system, regular maintenance also to the proportioners is a must. 'Smart Proportioners' optimize maintenance processes, allow remote troubleshooting and reduce costs.

GEN III proportioners from FireDos can be equipped with sensors and a control unit to enable remote monitoring.

The control unit records and processes the required sensor values, displays the operating parameters and determines the proportioning rate.

“
HUMAN ERROR IS THE
LEADING CAUSE OF
AUTOMATIC FIRE
PROTECTION SYSTEM
FAILURE.”

■ SMART FIRE PROTECTION – YOUR ADVANTAGES

REAL TIME VISUALISATION

- Proportioning rate and operating parameters at a glance.
- View operating procedures
- Remotely monitor operating parameters and device settings

LESS MAINTENANCE COSTS

- Get reminders and instructions for recommended testing
- Conduct assisted services
- Generate standardized test reports

EARLY TROUBLESHOOTING

- Monitor parameter development
- Allow remote monitoring assistance
- Less service requirements on site
- Reduce downtimes

■ AVAILABLE WITH SMART PROPORTIONING

- ✓ Runtime log
- ✓ Water flow
- ✓ Foam agent flow
- ✓ Position monitoring proportioning/returning
- ✓ Position monitoring flushing
- ✓ Interactive maintenance guide
- ✓ PLC for external monitoring
- ✓ Service reminder function
- ✓ Automatic service reports
- ✓ Set alarm thresholds
- ✓ Language selection
- ✓ Metric/imperial selection
- ✓ Download of long term operating parameters for analysis
